

Dr. **Albert Globus**, MD, was born on October 13, 1931 in New York and passed away on January 24, 2021 in Santa Cruz, California. He lived to 89 and was father to nine children. He healed the sick as a physician and psychiatrist, and elucidated the workings of the brain as a scientist, making seminal discoveries in how the brain processes visual learning.

He was a dedicated therapist who took on many pro-bono cases, and became a go-to forensic psychiatrist in the western United States, working for the defense in many capital punishment cases. While in practice in downtown Sacramento, Al redeveloped and restored an historic Victorian building, converting the building into a handsome multi-tenant medical office building entitled, The Jeffrey Building. He also was a lifelong writer, publishing a book of poetry and prose, *From Minefield to Mind Field*. He was an Evans Scholar, with the distinctions of being both the youngest awarded a college scholarship at 16 yr. of age, and the first in California.

Al was a true humanitarian activist, supporting several causes over many decades in the United States and abroad. Al was a perpetually curious, deeply studious, kind, enormously generous, and adventurous person who cared deeply about making the world a better place. He lived his life values, helping to heal others and serving as a role model for all of us.

He leaves behind his wife, Elizabeth "Liz" Globus, children Al Globus Jr., Ruth Globus, Charlie Abdi, Sue Lincoln, Anna Della Corte, Lee Globus, Simon Mudahogora, Regina Muhamahoro, Denise Uwingabire, ten grandchildren, thirteen great-grandchildren, and an extensive circle of family, friends and colleagues. He was preceded in death by his brother, Robert Globus, and grandsons Daniel Moreno and Dimitri Weinstein. He brought a truly unique light to our world and will be deeply, deeply missed.

In lieu of flowers, please send donations to The Friends of Rwanda Association (F.O.R.A):
